Registered Scope:

The ISMS covers the management of the digital platform, which supports the capturing and storage of personal health data, for the following ResMed applications in Europe:
• AirView, medical devices information monitoring service for healthcare providers;
• myAir, monitoring and coaching service for patients.

The ISMS also includes the management of service providers performing infrastructure - hosting activities, the provision of network communications and/ or product development or application support. These activities include:
• Provision and maintenance in operational condition of premises enabling the physical infrastructure of the health information system to be housed
• Provision and maintenance in operational condition of the physical infrastructure of the health information system
• The provision and operational maintenance of the information system's application hosting platform
• The provision and operational maintenance of the virtual infrastructure of the information system used for health information processing
• The administration and operation of the information system containing health information
• The health information data backup.
This scope of the ISMS is limited to the ResMed Lyon site in accordance with the SoA v9.0 dated 24/11/2025.
