

# We make it easy to choose the right mask

Resmed makes it easy to understand key mask benefits, and every mask is designed to deliver effective therapy and a comfortable night's sleep. But each category offers something a little different.

Full face masks cover your nose and mouth

Nasal and nasal pillows masks cover only your nose

## Minimalist masks

Small. Light. Simple.

If your primary driver for choosing a mask is less mask on your face, this category may be for you. It features masks that are small, lightweight and easy to use. And minimal facial coverage allows for an open line of sight, helping support your usual wind-down routine, whether that includes wearing glasses or reading before bed.

### Full face mask\*

AirFit™ F40

### Nasal mask

AirFit™ N30

### Nasal pillows mask

AirFit™ P10

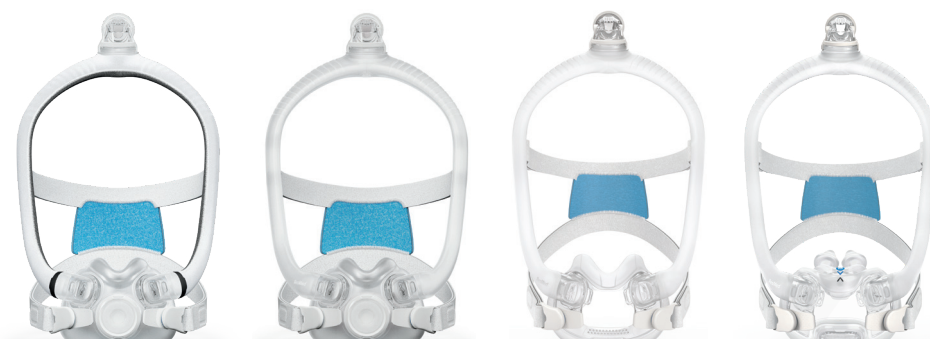

\*AirFit F40 contains magnets.

## Freedom masks

Sleep and move comfortably.

If you're an active sleeper, this category features masks with a top-of-head connection, keeping the tubing out of the way so you can move comfortably throughout the night. These masks are designed to let you shift positions freely, including sleeping on your side or stomach.
