

Respiratory care accessories catalogue

Note: Some products and accessories may not have a complete list of compatible ResMed ventilators indicated within this catalogue due to ongoing compatibility testing. Please consult the individual product user guides and compatibility guides for conditions of use, warnings and precautions associated with each listed item.

Welcome to the ResMed respiratory care accessories catalogue

Thank you for choosing a ResMed ventilation solution. To help you maximise its potential, all our ventilators are available with a range of accessories, which can be used to further tailor therapy. Whether you are looking for added monitoring, transport options or humidification, this catalogue includes all the necessary product information to help you choose the right accessory for your applications. To keep updated with our latest available accessories, you can also visit [ResMed.com](https://www.resmed.com)

S9 VPAP™

ResMed's VPAP series provides non-invasive bilevel devices for your non-dependent and spontaneously breathing patients with respiratory insufficiency. From initial setup to long-term care, the VPAP series delivers quality ventilation with a variety of accessories to help you meet a wide range of patient needs.

Lumis™

Lumis is a non-invasive ventilator series designed for non-dependent patients with respiratory insufficiency. Easy to set up and use, Lumis ventilators feature intelligent technologies, including iVAPS and AutoEPAP, which automatically adapt to individual breathing needs – making personalised ventilation easy.

Stellar™

The Stellar range is ResMed's premium non-invasive ventilator with invasive capabilities for non-dependent patients with mobility needs. This versatile device has a range of complimentary accessories, including a remote alarm, a mobility bag, internal and external battery options, and an SpO₂ and FiO₂ kit.

Astral™

Astral delivers excellence in leak and valve ventilation for invasive and non-invasive therapy. Featuring an impressive battery life, quick setup, and FiO₂ and SpO₂ monitoring options, it is suitable for a wide range of patients. It also offers mobility bags, external batteries and a dedicated hospital trolley for daily travel and convenience.

Elisée™ 250

Elisée 250 combines portability and easy-to-use features with the performance and reliability needed for ambulance use during patient transportation. Available with EtCO₂ monitoring, hot swappable battery options, a dedicated mobility bag and other transport-friendly accessories, this ventilator offers a complete solution.

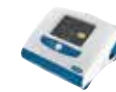

Elisée™ 350

Elisée 350 delivers the performance of Intensive Care Unit (ICU) ventilators, with all the benefits of the Elisée 250 plus more advanced features. Made for emergency and critical care, it is suited to treating acute respiratory failure patients in hospital and during transport. EtCO₂ monitoring and a wide variety of accessories are also available.
