

Standard Trolley

Suitable for home and hospital use

Purpose-built for ResMed's world-class range of ventilators

- Designed to carry ResMed's comprehensive range of ventilation devices—an interchangeable top plate to suit each model
- Perfect for the bedside—a basket neatly holds everything you need and an optional support arm keeps the air tubing away from the floor
- Stable and portable—with a stable five-wheel base (three are lockable) and an inbuilt shelf for the ResMed Power Station, the entire system can be transported on a single trolley
- Convenient humidifier bracket—makes it easy to hook on an external humidifier in one simple step

Some accessories are so well-designed, they become essential.

USEFUL ADD-ONS

- Circuit support arm keeps the air tubing away from the floor, reducing any 'pull' on the patient's mask or tracheostomy
- Tube clips securely hold the air tubing in place
- Interchangeable top plate is available in a variety of sizes to suit various devices
