Resmed

ResScan™ Essentials

Software release notes

English

ResScan Essentials 1.3

Product description

ResScan Essentials is designed to be used as a data viewer that enables clinicians and healthcare professionals to download, review, report, and share retrospective therapy information recorded by compatible Resmed therapy devices.

What's new

- Added support for AirCurve ™ 11 ST (with alarms), AirCurve 11 ST-A and Lumis™ 11 ST-A devices in select regions.
- Refined navigation speed and added keyboard commands to **Detailed graphs** and **Summary graphs**:
  - Use the Left and Right arrow keys to move the selected time period backwards or forwards in **Detailed graphs**. Use these same keys in **Summary graphs** to change the selected day.
  - Press **Ctrl+Up** arrow or **Ctrl+Down** arrow to increase or decrease the selected time scale.
- Updated display of summary settings and statistics:
  - EPR setting labels now match patient and clinical menus on devices.
  - Related summary settings now appear only when they apply. For example, **Ramp time**, **Start pressure** and **Start EPAP** appear only when **Ramp enable** is **On**.
  - Usage statistic labels are better defined. For example, **Median daily usage** is now **Median usage (used days only)**.
- Users can now sign in with PIV smart cards.
- Fixed several bugs to increase overall stability.

Recommended system requirements

- Microsoft Windows ® 10 or Windows 11 operating system
- **Network**: 10/100/1000 Mbps
- **Storage**: 850 MB needed for installation, with additional storage required for data
- **USB**: USB A port (or USB A adapter)
- Google Chrome ® or Microsoft Edge ® browser
- A portable document reader, such as Adobe Acrobat Reader ® software
