

ResMed

EasySpeak™ mouthpiece

Convenient daytime ventilation support offering patients a discreet and unobtrusive solution.

ResMed's EasySpeak mouthpiece has been thoughtfully designed to help your patients breathe comfortably and communicate naturally.

Compatible with a wide range of ResMed designated ventilators, it's the ideal daytime solution when comfort matters.

Discreet

EasySpeak's minimal, lightweight and discreet design makes it unobtrusive, so your patients can communicate easily with their friends and caregivers. It also offers them the freedom to enjoy the simple things in life, like helping to make eating and breathing more 'natural'.

Safe

Research has shown that mouthpiece ventilation can reduce respiratory infection associated with tracheostomy.¹ Mouthpiece ventilation, such as EasySpeak, can help reduce the risk of complications and infections, protecting your patients' every breath.¹

Easy to use

Its user friendly design makes EasySpeak simple to set up and easy to clean, saving you time. And fewer parts mean that it can be assembled quickly, leaving you with more time to focus on what's really important—your patients.

Comfortable

It's ergonomically designed, with a unique curved 'lip' that encourages a proper seal without having to bite down. So your patients will enjoy maximum comfort, day after day.

Convenient

EasySpeak can help with air or breath stacking for secretion management. With no additional equipment required, and no need to constantly disconnect the ventilator, it's simply a convenient solution for both your patients and their caregivers.

Tailored choice

From the conveniently pre-mounted mouthpiece on a thin flexible tube, to the stand alone angled mouthpiece, you can choose the solution that best suits your patients' needs.

Product codes

EasySpeak mouthpiece angled for 15M connection	21351
EasySpeak mouthpiece angled for 22M/15F connection	21354
EasySpeak mouthpiece angled with 17 cm flexi-tube 22F	21353
