Fitting Guide

Prior to fitting your mask, remove the orange spring frame support from the rear of your mask and retain for future use.

1. With both lower headgear clips released, position the cushion at an angle on the nasal bridge.
2. Keeping the upper position of the mask in place, swing the lower half of the mask down against the face.
3. Hold the mask firmly against the face and pull the headgear over the head.
4. Bringing the lower straps below the ears, clip the headgear into the lower part of the spring frame.
5. Unfasten the Velcro®, pull the upper headgear straps evenly until they are comfortable and firm, and reattach the Velcro.
6. Repeat step 5 with the lower headgear straps.

Tip One

• Ensure the headgear is correctly positioned on the head.

Tip Two

• Ensure the mask sits mid-bridge and does not encroach on the eyes.
