# A mask designed to make life easy

What if sleep therapy could be easier, more comfortable and more discreet? The AirFit N30 is designed to address common issues you might face with therapy.

It's small, simple and easy to wear. The soft, comfortable nasal cradle nestles gently under your nose.<sup>1</sup> There's no risk of red marks and discomfort on your nasal bridge. The QuietAir™ vent makes very little noise and gently diffuses exhaled air.<sup>1,2</sup>

## Simply designed for an easy fit

- 1 **Nasal cradle cushion** nestles gently under your nose, not in your nostrils.
- 2 **Diffused venting!** means you can sleep close to your bed partner.
- 3 **The adjustable headgear** is gentle on your skin and can be adjusted for a personalised fit.

## Easy to choose

The AirFit N30 comes in a convenient starter pack. The pack contains the frame, adjustable headgear and a small and medium cushion, which are colour-coded. If you need a small wide cushion, you can buy one separately.
