

Physician Self-Assignment Quick Guide

Overview

Instead of waiting for the care provider to give them access to a patient file, physician users can use the following procedure to assign themselves or another physician in their practice to their patients. This allows them to co-manage patients with a patient care provider who uses AirView.

STEP 1

In AirView, select the **Patients** tab and click **All therapy**.

The screenshot displays the ResMed AirView web application. At the top, the ResMed logo and 'AirView™' are visible. The user 'Clémence Dini' is logged in, with 'Logout' and 'Help' links. The main navigation bar includes 'Patients', 'Business', 'My profile', and 'Administration'. The 'Patients' dropdown menu is open, showing options: 'All therapy' (highlighted with a red circle), 'Wireless', 'Action Groups', and 'Ventilation patients'. Below the navigation, there's a section for 'Patients' with filters for 'Status' (Active), 'Average Usage' (-- Select --), and 'Therapy mode' (All modes). An 'Apply' button is present. A 'Search patients' button is also visible. Below the filters, a table header is shown with columns: Type, Name, Available data, Last Period Compliance, Current Period Remaining, Current Period Average usage, and Last updated. A blue banner below the header reads: 'Search or filter patients from above to view the patients list.' The footer contains a shield icon, 'Terms of use', 'French Data Hosting Agreement', 'View system requirements', 'Need access to AirView?', 'Intellectual Property', 'Privacy and Cookie Notice', and version information: 'AirView Premium - version 4.39.1-2.0.0 - © ResMed 2019 UDI:(01)840193400092(8012)v4.39.1'.

STEP 2

Click **Access patient file**.

The screenshot displays the ResMed AirView™ web application interface. At the top, the ResMed logo and AirView™ trademark are visible. The user is logged in as Clémence Dini, with options for Logout and Help. A navigation bar includes 'Patients', 'Business', 'My profile', and 'Administration'. The 'Access patient file' button, located below the navigation bar, is highlighted with a red circle. Below this, the 'Patients' section features a search bar and a 'Search patients' button. Filter options for 'Status' (Active), 'Average Usage' (-- Select --), and 'Therapy mode' (All modes) are provided, along with an 'Apply' button. A table header is visible with columns: Type, Name, Available data, Last Period Compliance, Current Period Remaining, Average usage, and Last updated. A blue banner below the header reads: 'Search or filter patients from above to view the patients list.' The footer contains a shield icon, links for Terms of use, French Data Hosting Agreement, View system requirements, Need access to AirView?, Intellectual Property, and Privacy and Cookie Notice, along with version information: AirView Premium - version 4.39.1-2.0.0 - © ResMed 2019 UDI:(01)840193400092(8012)v4.39.1.

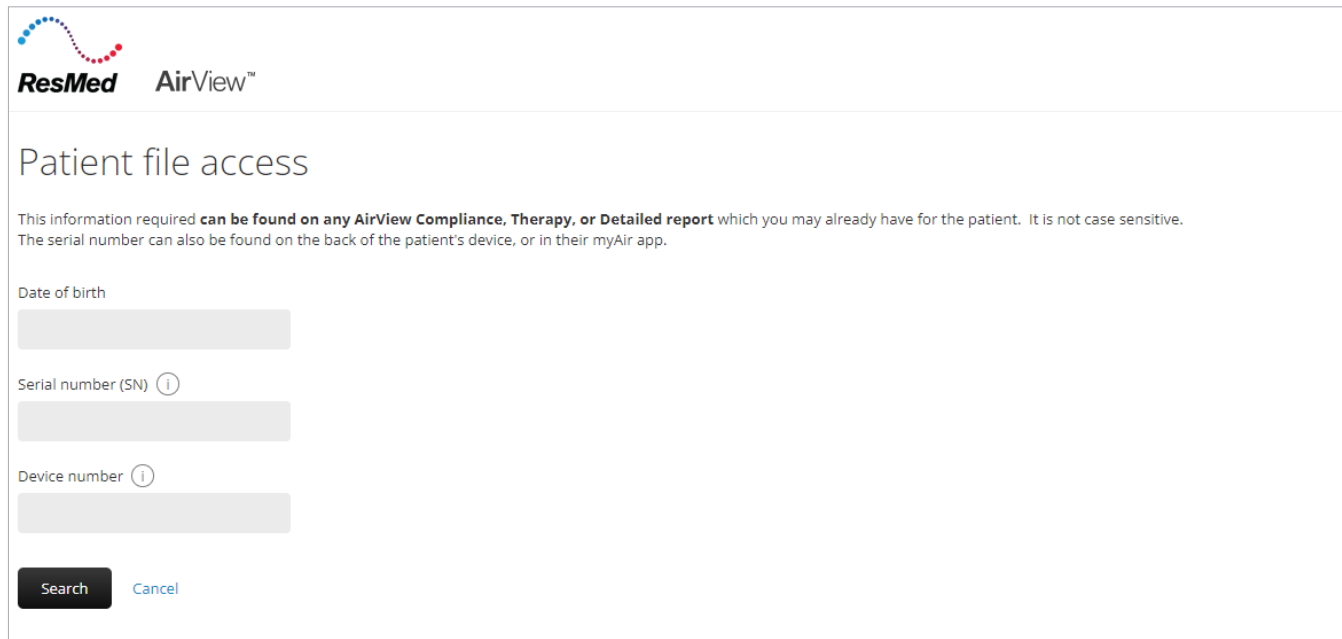

STEP 3

Search for your patient by specifying:.

- a.** date of birth (MM/DD/YYYY)
- b.** the serial number of the patient's device (11 digits)
- c.** the device number of the patient's device (3 digits)

The patient details must be an exact match for one patient. If the information you provide matches multiple patients, or no patients, you receive an error noting 'no patient file found'.

Click **Search**.

The image shows a screenshot of the ResMed AirView Patient file access form. The form is titled "Patient file access" and includes a header with the ResMed logo and "AirView™". Below the title, there is a note: "This information required **can be found on any AirView Compliance, Therapy, or Detailed report** which you may already have for the patient. It is not case sensitive. The serial number can also be found on the back of the patient's device, or in their myAir app." The form contains three input fields, each with a corresponding letter in a purple circle to its left: "a" for "Date of birth", "b" for "Serial number (SN)", and "c" for "Device number". Each input field is a light gray rectangle. At the bottom of the form, there are two buttons: a black "Search" button and a blue "Cancel" button.

ResMed AirView™

Patient file access

This information required **can be found on any AirView Compliance, Therapy, or Detailed report** which you may already have for the patient. It is not case sensitive. The serial number can also be found on the back of the patient's device, or in their myAir app.

a Date of birth

b Serial number (SN) ⓘ

c Device number ⓘ

Search [Cancel](#)

STEP 4

- a. Verify the patient is correct and select the check box to confirm you received consent from the patient to handle their health data.
- b. Click **Continue**.

Patient file access

Review and confirm this is the correct patient

LnameFirstThree, FnameFirstThree

Date of birth	00/00/0000
HCP	Healthcare Professional Clinic
Phone (last four digits)	0000
Device serial number	000000000000

a ☐ I confirm that I have received consent from this patient to handle their health data.

b Continue [Incorrect patient](#)

Step 5

- a. Select the correct physician from the Patient's physician list.
- b. Click **Save**.

The assigned physician can now view the patient file and all physician clinical users within the physician's organisation can also view the patient's file.

Add Physician
Physicians and their staff added will be able to view this patient file.

Patient's physician

a

b **Save**

Physician added

Access granted
The patient file can now be viewed and integrators can be added to allow data transfer.
