

Cookie Notice

Effective Date: January 30, 2018

ResMed uses cookies and other technologies to enhance user experience on our websites and in our mobile apps. This notice explains how we use these technologies and the choices you have.

1. Cookies

A cookie is a small data file created by websites you visit used to store information on your device. Other tracking technologies are used for similar purposes.

We use cookies on our websites (whether or not you have registered or signed in to any of the services we provide).

Cookies may collect certain information about you, your device and your use of our websites to identify your device when you revisit our websites. For example, we may use cookies to remember your website preferences, deliver ads to you on or off ResMed websites, prepopulate forms, recall your authentication information so we can keep you signed in to our websites, or track statistical information related to navigation throughout our websites. We may use both "session" and "persistent" cookies to better operate our website applications and enhance your experience.

A persistent cookie helps us recognize you as an existing user, so you can return to our password-protected websites without signing in again. After you sign in, a persistent cookie stays in your browser and will be read by ResMed when you return to one of our websites. A session cookie enables certain features of our websites and is deleted from your device when you disconnect from or leave the website.

Please note that third-party websites you navigate to from our websites may also use cookies to display ResMed content. We cannot control how or when those cookies are applied. For example, when you link from our websites to a third-party website, that website may have the ability to recognize that you have come from our websites by using cookies. If you have any questions about how third-party websites use cookies, you should contact those third parties directly.

2. Web beacons or GIFs

We also may use web beacons or graphics interchange formats (GIFs) to allow us to adjust our website content to better respond to your needs. Web beacons are small graphics embedded in a web page, which unobtrusively track the online movements of visitors. The web beacons we use do not currently track, collect or link to your personal data.

3. Updates to this Cookie Notice

We may update our Cookie Notice from time to time. When we change the Cookie Notice in a material way, a prominent notice will be posted on our websites. Updates will take effect 15 days

after the updated Cookie Notice is published. Each Cookie Notice will include the date on which it was last updated.

If you disagree with the changes you can edit your browser preferences to refuse to accept cookies, remove cookies or notify you when a cookie is set (select the "Help" menu on your browser to learn how to change your cookie preferences). You do not have to accept all cookies sent to you by our websites. Depending on the particular cookie you reject, you may not be able to use some features on the website you are visiting or signing in to.

No change to the Cookie Notice will change any data processing permissions you may have granted separately.

If you have any questions regarding our Cookie Notice, please send us an email to privacy@resmed.eu in Europe or privacy@resmed.com outside Europe.
